**E. SESSION SUMMARY:**

This target has the sensations, movements, spinning motions and concepts reminiscent of a helicopter, or relating to, thereof. There is not much description with this target because nearly all of the perceived information was in the form of sketches and figures.

The following "written" impressions were perceived:

- a strangely shaped propeller.
- vertical stripes.
- sharp angles and circles.
- a clear, glassy and shiny surface reminiscent of a "bubble".
- a spinning motion.
- the sensation of traveling forward and then dropping vertically straight down.
- wire mesh.
- a basket-like object being lifted/lowered from above.
- light reflecting off of falling "dust" in the dark.

This object is being  
lifted / lowered  
from above ; feels  
like wire mesh  
construction
